

DONORASSAY™ DIAGNOSTIC REPORT

PART 1: PARTNER INFORMATION

DONOR 1:

DONOR 2:

RECIPIENT:

Patient ID:

Order received:

Physician:

DONOR 3:

DONOR 4:

DOB:

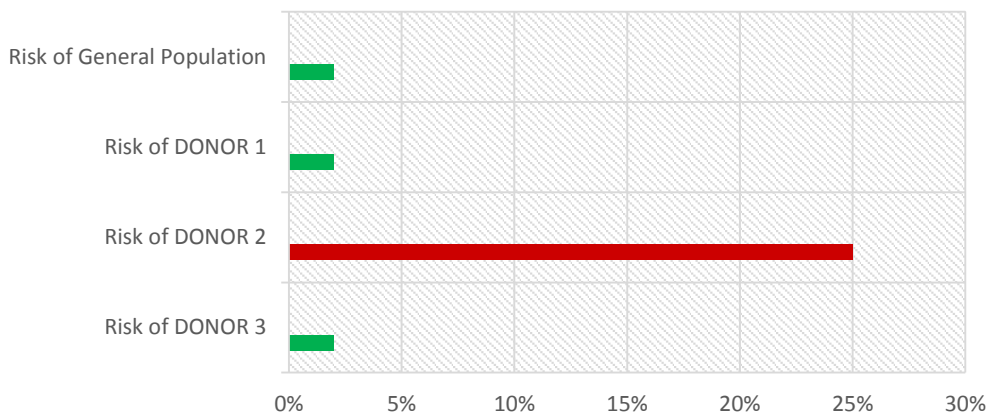

SAMPLE ID:

Report issued:

PART 2: ASSAY INFORMATION

DONORASSAY™ is a genetic diagnostic test to determine the risk of genetic disorders of the baby from the donated sperm samples. **DONORASSAY™** support your physician to more accurate genetic counselling before getting donated sperm. The assay is based on DNA sequencing of the genes coding for the most common disorders in desired region.

PART 3: RESULTS

PART 4: RECOMMENDATIONS

DONOR 1 and 3 are recommended to be used in ART (assisted reproductive technologies)
